

Claims

1. Supplement preparation including
 - a) a first active component in form of biologically accessible silver, and
 - 5 b) a second active component in form of a material derived from cartilage, and any conventional accessory agents or additives.
2. Preparation according to claim 1, characterised in that it includes one or more additional active components.
- 10 3. Preparation according to claim 2, characterised in that it includes one or more additional active components selected among antimony pentasulphide, metallic tin and/or a tin salt, metallic zinc and/or a zinc salt, a sulphur containing substance and/or a iodine containing substance.
- 15 4. Preparation according to claim 3, including hepar sulphuris as a sulphur containing substance.
5. Preparation according to claim 3, including tare powder as a iodine containing
20 substance.
6. Preparation according to claim 1, characterised in that the first active component (a) is a colloidal silver.
- 25 7. Preparation according to claim 1, characterised in that the second active component (b) is derived from a cartilaginous fish, preferably a shark.
8. Preparation according to claim 1, characterised in that the content of cartilaginous material, calculated as dry matter, is 100 - 12,000 parts by weight per 1 part by
30 weight of biologically accessible silver, preferably 200 – 6000 parts by weight per 1 part by weight of biologically accessible silver and most preferably 300 – 3000 parts

by weight per 1 part by weight of biologically accessible silver.

9. Preparation according to any one of the preceding claims, characterised in that it contains 0.5 – 50 mg of biologically accessible silver per litre preparation, preferably 1 – 20 mg of silver per litre.
10. Use of (a), a first active component in form of biologically accessible silver, and (b), a second active component in form of a material obtained from cartilage, and any additional active components and/or conventional accessory agents or additives for the preparation of a health-promoting supplement preparation for livestock.
11. Use according to claim 10 of (a), a first active component in form of biologically accessible silver, and (b), a second active component in form of a material derived from cartilage, and any additional active components and/or conventional accessory agent or additives for the preparation of a preparation for the prevention and treatment of plasmacytosis, puppy disease, enteritis virus, three-day sickness and/or "sticky" kits in mink.
